April 2023

Wizards's Tarot Deck

Tarot Card of the Month

The Empress - The card of nurturance and care, of creation and comfort. April is going to be a month where we may need to take better care of ourselves and others while also utilizing our creativity for the new beginnings that arrive in the remainder of Aries season. There's a sense of finding the stable, comforting habits so that you're more easily able to roll with potential upsets. Eclipse season begins with the second new moon in Aries on the 20th and that along with the Sun joining Uranus for Taurus season it's a put your oxygen mask on first before helping others so you're all able to navigate change more easily.

Libra Full Moon

This Full Moon on Thursday, April 6th is at 16 degrees Libra. This lunation takes place with the Sun almost exactly conjunct Chiron and in a loose conjunction with Jupiter in Aries. Bring on the big feels! Full moons are release points in the lunar cycle, and with the conjunctions involved it's likely to be a time that's healing how we approach taking up space for ourselves. There's a releasing of how you've been trying to balance relationships and projects that has led you to feelings of overwhelm and burnout, it's a moment of reminding you that it's okay to put yourself first when needed and you'll be that much more ready to get back in action once you've found a new way of showing up for you.
