AUGUST 2023

## Tarot Card of the Month

The World - Phew y'all, I feel this and I bet you do too. This is the culmination card of the major arcana in tarot, it's the ending that makes way for a new start. August feels like a big wrapping up energy before we jump into the next chapter of our lives. Both Venus and Mercury will be involved in their retrograde timelines, then nodes have shifted into Aries/Libra, there's a lot of change unfolding and we're spending August wrapping up the lingering things we need to complete before we go full speed ahead into our new lives in September.

## Aquarius Full Moon

This Full Moon at 9 degrees Aquarius is at 1:32 PM CST on August 1st and the only close aspect for this lunation is a square to Jupiter in Taurus making the effects of our manifestations even bigger! An Aquarius Full Moon asks us to dive even deeper into our authenticity and unique interests. We're releasing any sort of lingering conformity and leaning into how we can embrace relationships, habits, and ways of being that further align with our values, especially with Venus Retrograde co-present in Leo. The Jupiter in Taurus square is bringing up how we're balancing our comforts, routines, and habits with what's really best for us, for our community, and for the environment. Is there a way you can let go of the things you've always done because everyone else does them and embrace a more innovative, unique way to go that aligns with your values and helps to create a better world for others?

## August Transits

- |                              |                                    |
