

# This Woo Woo Stuff

March 2023

Modern Witch Tarot Deck

## Tarot Card of the Month

Temperance - Okay y'all here's the thing, huge changes are coming in March with Saturn, Pluto and Mars changing signs. The key with Temperance is not to throw out absolutely everything but instead to see what you have that you can repurpose and turn into something else or something more. The changes you've been working on, take it to the next level. The things you've been releasing, let them go and have the space to see what's ready to come in. There's transformation here with how you've set up your commitments and ways of being, embrace the change.

## Virgo Full Moon

This Full Moon on Tuesday, March 7th is at 16 degrees Virgo. This lunation is trine to Uranus in Taurus and with the Sun in a sign based conjunction with Neptune, Mercury, and newly arrived Saturn in Pisces, this full moon is layered in both endings and realizations. Expect ah hah moments around where your boundaries need to be replaced, upheld, or dissolved. Much of this may be surrounding how you give of your time, energy and resources to others and whether that is being reciprocated fairly. Full moons are often the culmination point of a situation and show you what needs to be released so that you're able to move forward. Setting boundaries for yourself or with others can feel like letting go of an old approach or way of being that is often not easy emotionally. Give yourself space to acknowledge what's necessary.

## March Transits

- |                                 |                                 |
