October 2023

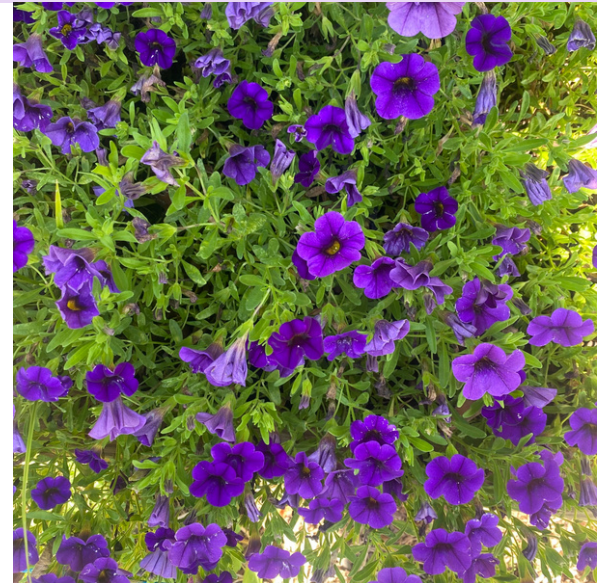

Tarot Card of the Month

The Star - Phew y'all, love when we get The Star card! This is a card that reminds us to have hope, to stay positive, to keep the faith that everything will turn out the way it needs to even if it feels difficult right now. The Star is also a card of healing, rejuvenation, a combo of fresh start with second chances. Eclipse season this October will bring many shifts and changes but knowing that our card of the month is The Star it's all going to shake out for the best even if it doesn't seem like it in the moment. Some of the occurrences with the eclipses may feel jarring and like the rug gets pulled out from under you but with the Star card know that there's something or someone there to catch you right when you need it.

Taurus Full Moon Eclipse

This Full Moon is at 5 degrees Taurus on October 28th at 3:24 PM CST. The moon will be conjunct Jupiter, sextile Saturn, and opposite Mars and Venus who are hanging with the Sun in Scorpio. That's a lot of players happening with one lunation especially since it's also within range of the south node to be an eclipse. This is the final eclipse in Taurus, fulling closing out the 18 month long cycle of eclipses between Taurus/Scorpio. With all of the other planets involved, get ready for a big change in how you find your sense of stability and security both in tangible ways and emotionally. Know that this weekend you're going to have some big feels about where you are in life and you'll want to take action on those feels. Thankfully Jupiter and Venus are both involved so you'll get a mix of yay I'm doing things and going places and oh man, where am I headed. With all eclipses my best advice is always to just let it come and ride the wave.

October Transits

- | | |
|----------------------------------|------------------------------------|
| 10/2 - Mercury opposes Neptune | 10/19 - Sun conjunct Mercury |
